

2. Requirement Analysis

2.1. System Requirements

Hardware Requirements

- 20 GB free SSD space
- Operating System
 - Windows 11 (64-bit) or equivalent
- Internet Connection
 - High-speed broadband connection
- Hardware Components Used
 - Processor: Intel Core i3 or above
 - RAM: 4 GB or higher
 - Storage: SSD/HDD with sufficient free space
 - Keyboard and Mouse
 - Monitor/Laptop Display
 - Internet Connection

Software Requirements

Software	Purpose
Python 3.x	Programming language
Jupyter Notebook / VS Code	Code development
Pandas	Data manipulation
NumPy	Numerical computations
Matplotlib	Data visualization
Seaborn	Statistical visualization
Scikit-learn	Machine learning algorithms
Flask	Web application framework
HTML	User interface
CSS	Styling the web pages
Git & GitHub	Version control and project hosting

Functional Requirements

2.2. Non-Functional Requirements

--Performance: The system should process user input and generate prediction results quickly with minimal response time.
Accuracy: The machine learning model should provide accurate and reliable credit card approval predictions.
Usability: The application should have a simple and user-friendly interface that can be easily understood by users.
Reliability: The system should function consistently without crashes or unexpected errors during operation.
